Natures Balance Care Introduces the first only Organic Approved Hot Spot KIT for Dogs

Natures Balance Care has the only Organic Approved **Hot Spot Kit** for Dogs on the market today. Long before “Green” was mainstream *Natures Balance Care* was providing all natural, organic approved fly control and skin care products for the horse and organic livestock industries and now **Dogs** are their **priority** too. *Natures Balance Care* has developed and is now available the only organic approved Hot Spot Kit for Dogs on the market today.

“For years our customers have been telling us they use our products on their dogs with great success for hot spots, fleas and fly repellent and those obsessive lickers and chewers. So after extensive testing and analysis we combined two of our organic approved products, the Groomer and the Bare skin Barrier, to make our new Organic Hot Spot KIT for dogs” says Missy Wryn, CEO. “The Groomer for Dogs is an all natural skin scrub that is applied directly for soothing relief of irritated hot spot conditions and the Bare Skin Barrier for Dogs stops the licking and chewing, plus is a natural insecticide approved by the Organic Materials Review Institute (OMRI). As an environmentally health conscience company our products do not contain steroids, insecticides, pesticides or Pyrethrum. And in an effort to conserve fuel we offer direct buy access for retail pet stores and consumers plus we use reusable and recyclable materials”, Missy adds. “Even our packing peanuts are water soluble”.
