Kid Safe – Mom Relieved Organic Insect Repellent Spray From *Nature's Balance Care*

You know that all too familiar awful taste in your mouth after you use insect spray or those gagging heavy scented citronella “all natural” sprays? You can't eat your food at a picnic, camping or on a hike without that horrible taste all over your hands and that sticky, greasy feeling on your skin. *Nature's Balance Care* has a safe and effective all natural solution with their Organic Insect Repellent that does not contain DEET, Resmethrin, Pyrethrum or neuro-toxic chemicals. So safe it's edible yet effective in repelling pesky mosquitoes, flies and blood sucking insects. With natural skin conditioners there is no sticky greasy residue, just refreshed soft skin with your senses uplifted by lavender, geranium, lemongrass and other natural botanical ingredients.
